WORLDWIDE CONSULTING SERVICES

We Will Show You The Way To Be Successful

WE ARE COMMITTED TO OFFERING HIGH-PERFORMING INVESTMENT PACKAGES TO OUR INVESTORS.

Our primary focus has been on emerging and rapid growth investment markets with an emphasis on Forex (PAMM/MAM), Cryptocurrencies and other top performing investment solutions. We are proud to work to the highest ethical standards of Bitcoin mining and other trading strategies. We are pleased to offer some of the most dynamic and high-performing investment packages available.

NOTE : BULLSTEINTRADING.COM COMPANY TENDS TO ALSO DEAL WITH A VIP PLAN KNOWN AS “FIXED FUNDS DEPOSIT “

ABOUT FIXED FUNDS DEPOSIT

Fixed Deposit (FD) Is an organized investment package that allows you as an investor to manage your Bitcoin account with a higher interest rate other than the ordinary investment packages, this involves depositing and making withdrawals ‘monthly or yearly’.

In this package, you either do the fixed deposit 'starter plan or standard plan' and having in mind that no withdrawals are to be made until the agreed monthly or yearly date. No separate account is needed in this package, you can start with a direct fixed deposit account or migrate from your ordinary account to it, and no fees are to be paid to do this. In a fixed investment, investors are opportune to get a 28% weekly interest. The minimum deposit is \$9,999 to unlimited.

You are also eligible to request for a premature withdrawal from your fixed deposit funds in case of any emergency or sudden financial situations. However, as a certain amount of penalty will be paid to achieve this, having the knowledge of not withdrawing till the agreed time with cost you 5% of your investment from the company both in starter and standard plan has same deductions in this case. Furthermore, not been able to roll up with the weekly deposit of the fixed funds deposit will attract your account to be frozen by the company and to unfreeze this comes with a deposit of the Company's ordinary minimum investment which is the deposit of \$200 to activate your fixed account permanently.

Benefits:

Fixed Investment allows you to accumulate more funds in a random role while investing. It's a risk-free investment plan and guarantees fixed returns from the PAMM AND CySec Policy. Fixed Investment interest rates are earned massively at the end of the investment that the ordinary packages.

CRYPTOCURRENCY

PROFESSIONAL CRYPTOCURRENCY TRADERS AND ANALYSTS

Bullstein Trading Investment is an investment services company. We offer our investors access to high-growth investment opportunities in the Bitcoin markets.

Our professional team will take charge of trading and mining management. Your investment profit is secured.

For the first time in history, value can be sent anywhere in the world at the same speed as Information, in a secure and trust-minimized way. A departure from conventional economic, political, and social systems run by a handful of large centralized institutions, digital currencies are powered by millions of peers within a globally distributed network, democratizing information and value in incredible new ways. Several digital currencies, each with unique comparative advantages, may radically transform legacy systems across nations and industries around the world, driving future economic growth and becoming more valuable as the keys to our digital, global economy.

At bullsteintrading.com, we believe investors deserve an established, trusted, and accountable partner that can help them navigate digital currency investing. That's why we are building transparent, familiar investment products that facilitate access to this burgeoning asset class, and provide the springboard to investing in the new digital currency-powered "internet of money."

PAMM/MAM INVESTMENT PACKAGE

PROFESSIONAL CRYPTOCURRENCY TRADERS AND ANALYSTS

PAMM (Percentage Allocation Management Module or sometimes Percentage Allocation Money Management) is a popular Forex broker extension that allows traders and asset managers to manage investors' money. Money Managers trade Forex accounts of the Investors via PAMM/MAM. The module simplifies and secures the relations between Investors and the Broker.

The PAMM/MAM investment package is a unique product that allows investors to earn without having to actually trade Forex themselves. You can invest in the Forex PAMM/MAM investment package, bullsteintrading.com will receive a percentage of the profits they earn from trading with your funds as a commission.

The PAMM service has been one of the most in-demand financial instruments in 2020 with a turnover of over \$92Bn during the first nine months of the year. Bullstein Trading Investment continues to improve and refine the service, striving to make it as transparent and understandable as possible for customers. As part of the next stage of operations, the PAMM account rating formula has been upgraded.

The method used to calculate the growth rate for a specific period has been updated in order to exclude being placed in the top rating of PAMM accounts that have not been traded for a long time. Now, the final calculation of positive growth for a specific period will not include data for the most recent period:

An annual calculation will not include the last quarter

A six-month or quarterly calculation will not include the last month

A Weekly calculation will not include the last week

Please be advised that calculations using the updated rating formula will begin on the 28th of October at 13:00 (GMT+3). You are kindly requested to take this information into account when planning your trading and investment activity.

FOR INVESTORS

Return

The potential of the Forex market is unlimited.
You can earn high returns by investing in a PAMM investment package without being skilled at trading.

Transparency

The PAMM service has undergone a compliance check by an international auditing firm. You can see the results of the audit for yourself in your Bullstein Trading Investment investor dashboard.

Control

You can withdraw your profits, or all of your funds, at any moment via your Bullstein Trading Investment investor dashboard. You can also spread your risks by investing in several different PAMM investment packages.

AS A LEADING GLOBAL ASSET MANAGER WE ARE DEDICATED TO CREATING LONG-TERM VALUE FOR OUR CLIENTS.

Aligning our brand with those who share our values and ambition helps us to strengthen and build our business around the world. It is also one of the ways that we are able to support the communities in which we operate. Our partnerships reflect our belief in continuous development, performance and sustainable growth – and we aim to inspire excellence in whatever we put our name to.

REAL ESTATE

PROFESSIONAL REAL ESTATE INVESTMENT

Bullstein Trading Investment is an investment services company. We offer our investors access to high-growth investment opportunities in the Bitcoin markets.

Our professional team will take charge of trading and mining management. Your investment profit is secured.

OIL AND GAS

Investors looking for portfolio diversification through sector-specific funds can find multiple opportunities within the energy industry – and more specifically, companies operating in the oil and gas drilling sector. It is necessary to analyze certain metrics to understand a company's level of profitability and make informed investment decisions. One of the measures commonly used to determine a company's profitability is the profit margin.

Investors can analyze a company's profit margin or net profit margin by completing a simple calculation that determines revenues. The profit margin of a company is determined by subtracting total expenses from total sales and then dividing that number by total company sales. This profit margin calculation does not take into account common stock dividends, but does include depreciation, taxes and interest expenses. A company's net profit margin is calculated similarly by subtracting total expenses from total revenue (not sales) and then dividing that number by total revenue. This gives investors deeper insight into how a company is converting its bottom line revenue into profit for shareholders.

Investors looking for portfolio diversification through sector-specific funds can find multiple opportunities within the energy industry – and more specifically, companies operating in the oil and gas drilling sector. It is necessary to analyze certain metrics to understand a company's level of profitability and make informed investment decisions. One of the measures commonly used to determine a company's profitability is the profit margin.

GOLD MINING TRADE

Gold mining is a global business with operations on every continent, except Antarctica, and gold is extracted from mines of widely varying types and scale.

Mines and gold mining operations have become increasingly geographically diverse, far removed from the concentrated supply of four decades or so ago when the vast majority of the world's gold came from South Africa.

China was the largest gold producer in the world in 2016, accounting for around 14% of total annual production. But no one region dominates. Asia as a whole produces 23% of all newly-mined gold. Central and South America produce around 17% of the total, with North America supplying around 16%. Around 19% of production comes from Africa and 14% from the CIS region. See our interactive gold mining map for gold production per country in 2019. Overall levels of mine production have grown significantly over the last decade, although substantial new discoveries are increasingly rare and production levels are increasingly constrained. Gold mining and mine production does not respond quickly to prices. The project development timeline and mine lifecycle is a very long one – it often takes decades to move from discovery to production.

SOLAR ENERGY

Solar power is energy from the sun that is converted into thermal or electrical energy. Solar energy is the cleanest and most abundant renewable energy source available, and the U.S. has some of the richest solar resources in the world. Solar technologies can harness this energy for a variety of uses, including generating electricity, providing light or a comfortable interior environment, and heating water for domestic, commercial, or industrial use.

There are more than 155.2 gigawatts (GW) of solar installed in the U.S., enough to power 27 million homes. Over the last decade, the solar market in the United States has grown at an average rate of 24% each year. There are more than 4 million individual solar installations in the U.S., ranging from small home rooftop systems to large utility-scale systems that add hundreds of megawatts of clean electricity to the power grid.

AGRICULTURE

Investing in farming can seem like a good strategic move. After all, whether the overall economy's in a recession or booming, people still have to eat. Because of this, many investors regard agriculture and farming Investments as being recession-proof. Further, as the world's population increases, farming will play an increasingly important role in sustaining global societies.

Investing in farming can seem like a good strategic move. After all, whether the overall economy's in a recession or booming, people still have to eat. Because of this, many investors regard agriculture and farming investments as being recession-proof. Further, as the world's population increases, farming will play an increasingly important role in sustaining global societies.

The closest that an investor can get to owning a farm without actually doing so is by investing in a farming through company that has a large scale of farming machanism Bullstein Trading) investment trust (BTIT).
